

The only FDA-cleared instrumented drug tests on the market, the eCup and xCup offer quick and reliable results. The self-contained testing devices offer instant 5-panel (eCup) and expanded panel (xCup) urinalysis with negatives delivered through a secure web-based system in as little as 5 minutes.

Why eCup and xCup?

- Self-contained testing devices don't require pouring, transferring or pipetting.
- Automated and instrumented testing systems streamline workflows and remove subjectivity in test interpretation.
- Electronic Chain of Custody Forms (eCCFs) allow the collector to avoid problems inherent to a manual process, eliminating dependency on paper and reducing costs related to administrative functions.
- Available panels include:

5 configurations in one cup!

	eCup	xCup 6	xCup 7	xCup 8	xCup 9	xCup 10
THC (Cannabinoids)	X	X	X	X	X	X
